When you install KMS2017, you need to register the product with Microsoft or Microsoft system.2. Download, install and run "KMSpico" and it will work automatically.3. After you open, click "Settings", the license will be registered automatically.4. Go to KMS or KMSpico's "Help" and read the manual.5. If you have any questions, please contact us: What is KMSpico? KMSpico is a software package used to keep track of all your Microsoft products. It is a software that will help you keep track of your licenses and the products in which you use. It is a software that will keep your current licenses, and will also allow you to purchase more licenses or license them for the first time. How does KMSpico keep track of my licenses? KMSpico keeps track of your licenses by a code that you can get from the key or the product key that you use to activate the product. That is why it is very important to make sure that you do not lose your product key. Can I use my product key for any other product? Yes, you can. The product key that you use to activate your product, will work for any product that has a code that corresponds to your product key. The codes that correspond to your product key are written on your receipt, on the instruction manual, or on the CD that you installed the product on. How do I find out my product key? You can find out your product key by searching through the following locations: When I enter my product key, it will always say that my product is not activated. Why is that? When 82157476af
